It's going to be a disaster. Think about it.
Anyone who understands just a little bit about coding knows that when this source will be released, it's going to be heaven paradise for cheat creators.
Within a few weeks Renegade will be crawling with cheaters, and it will die, just in time for EA's release of their new "C&C" game Tiberium...

That is very scary scenario.

And not unrealistic, we all know how much EA like to grab money. Not that we'd buy tiberium, we'd just struggle on, or move to Renegade 2007 or something similar.

It will be total chaos someone should take the source and lock it away and mayby fix some very annoying bugs.

And thats it.

Otherwise cheat-a-holic, and renegade will die!
