npsmith82 You cannot do this by just modifying skins.

It can be done only when creating a mod package, by clicking the "Strings" menu followed by "Edit Table". The loading screen items are found under the "LOAD" tab, half way down.

However, it's possible to edit the "strings.tdb" file but i haven't explored into doing that yet.

please do so i get bored with the same old boring writing...esp when it over lays the nice new skin..
