Ah I see, well the thing that was just tooo fucking stupid to be ignored was, back in like the old days, you did alot, I remember you from different ren communities and you'd help out, do this mapping thing, and you seemed to be connected to the people at Westwood, which helped our cause, then some anime faggits come along thinking they are better. Anyway, I now you have moved on to other, newer things, it just doesn't make fucking sense, who do these kids think they are?

Anyway...
