You say "No one else was hitting me". Right? How the fuck would you even know that? It looks like you were playing on a mighty big server, with a lot of people, so I'm guessing you have eyes in the back of your head and you can see everyone around you? Perhaps he got a few headshots in a row? Yes, it does happen.

And this is the fucking guy telling me why I'm a retard because I prefer 500 over 1000... Not only is he using a 500 in the video, he's fucking sucking. Thanks for proving yourself a worthless ReT@rD who cries because he lost to a soldier. But wait!- U R NOT HAV1NG PLAYD IN 1 YEER SO U GOT XCUSE!!!

Yeah. Someone else kept hitting him (at the exact same time as all of Jalil's shots) for 3.5 damage each time, except for when Jalil got a headshot, in which case someone else hit him for 17.5 damage. That must be it... you fucking idiot. There's really no arguing with the video. If your vision wasn't obscured by Jalil's body as you sucked his dick, you would've seen a GDI Soldier doing 1.5 times the appropriate amount of damage. Thanks for proving yourself a [sic] ReT@rD, dipshit.
