Why does this drop incur a death for the bots when they land, even if they have the M00\_No\_Falling\_Damage\_DME script attached?

(The attachment is named "gdi\_dropdies")

And here's another one of which I attempted to edit. This one crashes the game, and I'm believing that it is because only 3 drops are allowed?

(Named gdi\_dropcrasher)

Finally, is it any way possible to have this available for multiplayer modes? My purpose is to use a c130drop along with this to have a pleasant Nod and GDI battle.

Thanks.
