## Subject: My gmax no longer saves properly...
Posted by Aircraftkiller on Sun, 20 Jul 2003 20:44:49 GMT

Haha. No, I don't use Windows 98, I just use the Windows Classic scheme for Windows XP. I hate that bubbly looking standard scheme.

I did take out all that stuff earlier, and everything worked. gMax was able to open everything that had been corrupted, and it saved other files just perfect, as well.

At least you got to the bottom of this. How fucking annoying...
