Quote:rofl, oblivion lost this debate in his very first post when he admitted pirating games. Feel free to quote an argument he presented (it's quite hard to separate the wheat from the chaff in this case, there being so much chaff and so little wheat) and I'll respond to it...

Yet another arrogant response. How did he "lose" the debate? Because you said so? Yeah, no. Doesn't work that way, sorry.

Quote:I don't know where you got this from, because I didn't compare him to people who download and use cheats in servers, I compared him to people who make cheats... the similarities to 0x90 are just racking up, aren't they?

Minor reading mistake, my bad. But still. There's a difference between cheating, and what Oblivion's done. If you can't see that, then maybe you should just stop posting in this topic.

Quote:uh, are you slow? He's the one who started this LOL MY INVOLVEMENT IS > YOUR INVOLVEMENT pissing match, not me. You don't even know most of what I've done for the community... his is limited to answering a few questions in the mod forum (wow) and actively attacking EA because he's too selfish to actually consider genuinely helping the games' communities.

My point was, don't say "anyone reading this thread can see that" when I'm among the people reading it. Although, I suppose I exaggerated myself a bit too, so I 'spose it doesn't matter.

Anyways, if that's ALL you think he's done, that's pretty lame. I don't know how many times renhelp has answered my various modding questions.

And, why is it so hard to comprehend that he pirates them because if he bought it and still ranted, it'd look retarded that he then just payed for a product he thinks is shitty?

If he were to actively buy alot of EA games, then just say they're shitty, wouldn't it seem retarded that he's saying EA sucks when he's just fueling them more?

To be honest, it baffles me as to how so many people bitch about EA, yet continue to buy their products. If they're not buying it, they're not fueling EA atall, regardless of whether they play it somehow or not. If anything, playing it first hand is the best way to KNOW something actually sucks.

Oh, and the MAIN reason why EA rarely tests their products (Aswell as half-assing most games) is because they're rushed. Short deadlines != a quality product.
