---

I have Jasc Paint Shop Photo 5 and i cant figure out where to put dds.8bi. I couldnt find any folders with the program related to plugins or formats. I put the file in the general directory of it, went to XCC mixer and took a random .dds file and put it on my desktop. I use "Open with" Jasc Paint Shop Photo 5 and when it opens it says "Cannont open file whatever"

Any ideas?
