Goztow wrote on Sun, 27 April 2008 09:28The new password should have come up in a popup. But this might be easier:

* Download XWISC: http://xwis.net/downloads/XWISC.exe
* Your nicknames registered to your serial can be reset by hitting on 'Test'
* Select the 'Reset Password' box
* Hit 'Ok'
* Some text will now appear in the box below, with your new password alongside each or your nicknames

Obviously this will only work with nicknames on your own serial.

A pop-up oh, well I tried it again and this time it did. Thankyou very much
