This is great and helps alot before i did not know how to use the buttons

There was one little problem tho. When you edit the scripts on the button and add the JFW\_Prset\_Buy\_poke your parameters are differnt to the ones i got. on where it says name you got PresetName, Cost, Player\_Type but i got PresetName, Cost, Location, Player\_Type. i tried leaveing the Location blank but i do not get the weapon i added is there any way to fix this problem?

below is the link to this Tutorial
