nvm it works on another netwrok...i try to join jelly

i get this

```
13:42... * Connecting to irc.jelly-server.com (6667)
```

```
13:42... — 10irc.ren-ladder.com — *** Looking up your hostname...
```

```
13:42... — 10irc.ren-ladder.com — *** Found your hostname (cached)
```

```
13:42... The nickname 11 SSnipe is already in use
```

```
13:42... Press Control+F1 to retry taking the nick SSnipe !
```

i change my name and look..i dont see anyone else using my nick :S so idk why it wont let me join
