The N00bstories and Jelly IRC servers are linked, you might as well just add the jelly channels under the #n00bstories channel.

Quote:/join #n00bstories
/join #jchat
/join #jelly
/join #jelly2
/join #jelly-ra
/join #jelly-marathon
/join #jelly-mappack

As for the \$network == X, X should be the network name displayed in the treebar on your left. For example, on Jelly's IRC, it should be 'Jelly-Games'.
