HORQWER, please stop infuriating other members of these forums by bragging. You have been not allowed into the RP2 team so please stop trying.

Cabal8616, please stop flaming him on no grounds of what he may actually release.

Until he does release his mod that you claim is a rip-off, there's no use in condemning him for stealing RP2 until you have proof. He may not even publish the mod at all, or it may have no RP2 material in his final release.

well said thank you
