madrackz wrote on Thu, 22 May 2008 01:41No No No! You can add Building Controllers Serverside on SP Maps! But where did you Placed them? did you tryed to enenable SP Buildings or MP Buildings? Tell me wich buildings you want to get work! And what map you Edited, MAYBE you had "Terrain Selectable" and you moved the map thats another reason why this map Crashes.

wat i mean is i deleted the sp bar one and replaced it with a mp one cuase a map cant start without a building right? iv seen it another servers expect they replaced the wf or air witha ref controller to get more money.....so i tryed to see if this work...so keep so controllers?
