To cmatt it wouldnt let me host a game because it said it couldnt connect to WOL server. Now its letting me host and join the game that I hosted but I still can't see other games.

To Goztow

I looked at the FAQ page and checked the firewall and the hosts file. Both seem to be all right. I can see the XWIS message and nothing appears to be wrong there. Then, when I connect to the USA server (since im in US) no game listings appear.
