Subject: mouse 5 +renegade D: please help
Posted by Poponfu on Sun, 01 Jun 2008 22:33:49 GMT

I went through the key config thing and the config files also tried to use intellipoint software to bind the buttons to keystrokes and that wont work either. Has anyone managed to do this ? Its driving me crazy not being able to use them.

I have intellipoint explorer 3.0 and am using the latest vista 32 bit intellipoint software (6.2)

Thanks, pops
