Like there are only a few (like 4) specises in the world that has sex for more than reproduction, as in for fun. Humans and dolphins are one of them. Also we did most likely ivolve from a water organisim because of what SSADMVR said earlier about the webed toes and fins. Apes don't have fins and such. So where did we get thoes. [I was refering to the humanoid species we were before we evolved]

Can we stay one topic por favor? Please.
Did you just ask yourself to stay on topic?
