Notes:

Sorry I couldn't post the PNG version, but the file was too big. I could have reduced the colours but that would have ruined the whole idea of a full quality image.
All the screen-shots were taken in-game this time, as the characters weren't posable in LE. Mind you I didn't pose them, I just waited until they played one of their Loiter animations before snapping pictures.
I tried to place the engineer into the ground, but of course he wouldn't spawn so I had to photoshop his feet out.
In the first mini-frame I forced the soldier's pose by shooting him in the head (notice the cloud of blood to the right of his head) and in the second I simply killed him before snapping my shots
Again, if anyone knows what bones file I need to use/edit to pose the models, please tell me.
Below are two LE shots of this comic.
