I think I have a problem though, it doesn't seem to display my server in the listing. It lists all servers listed in GameSpy. If you server is not listed, then it either does not promote to GameSpy or it sends an invalid GameSpy query response, what some servers actually do (the ones listed as 'unscanned')

Any way to show the WOL servers? pretty much all the decent servers didnt show in GSA last time i checked

Listing WOL servers and enabling to connect to it is difficult.
