Subject: 3D models rendered as grey cubes in LE

---

I made a triangular glass room building in RenX and then exported it as a Hierarchy W3D file. After attempting to make a tile with this model in LE, I'm presented with the debug information loading the textures and then a small grey box appearing where my model should be.

In W3D view the object renders correctly, so I attempted to export it as a terrain and use a terrain preset in LE, to no avail.

Is this a material/texture related problem or a general hiccup made by the dodgy renegade tools?
