If it's connected to gamespy, then gamespy will give you this information. If it isn't connected to gamespy, then ask the server owner for the ip. Big chances are that he doesn't want to give it out for direct connectors as it's a security risk, though.

Anyone posting a way to get IP's from xwis servers will get a warning. If troop does so, he'll get a 2 weeks ban. Just so we're clear.
