XeonXR6 wrote on Fri, 20 June 2008 16:36lol, the gold colour is my favourite!

The 25% HP gain, bumps the cost of the bike up around 100% more and the insurance premium around 400% more.

Don't forget, I'm 19, insurance companies in the Uk would not touch me on a GSX-R (Gixxer).

Andrew.

Edit: This GSX-F will easily push 140. Gg... lol

Yeah the R would have cost you more. 140MPH from a 600.. I should hope so as well. Please do tell me how you get insured for a bike that you dont have a license to ride. As you say, you're 19. Therefore you're restricted to any size bike with a maxium power outlet of 25kW that also has a power to weight ratio of 0.16kW/kg

The last time I checked the the F produced 55-62kw...
