Caveman wrote on Fri, 20 June 2008 12:00Yeah a normal 600 will obviously beat a 250 hands down but what im saying is, now that you've restricted your 600 to 25kW its now basically a 250 since most 250 produce around 22-28kW mark. So now you basically have the power of a 250 but the weight of a 600.

I can only feel a difference in the bike at the top end, 9-11k rev range. Other than that, the bikes acceleration is just fine, .

Got a great deal on the bike, so i'm happy, lol.

I'm 6' 9(1/2)", I could never fit on a 250. If I could, I would look silly.
