page failed to load or is invalid
this is what you get when to click on new account

when i fill in a new login name and password i get in but don't get any servers

it says no game server found at this time

after making up like 7 new accounts i made another one to try it again. Now it tells me im only allowed to have nine accounts on 1 serial. All the login names i made up are shown in the display. at also says press reset password if u want to reset all passwords.

if there any other way to make an account?
How do i Reset password?

thanks,
