Hope that helps.
N1warhead.

Thank you for such a fast reply! I got it now and have installed it but my models can't be seen!!!

I extracted the W3d model and I open it but can't see the model on the stage to the right side.

Am I using wrong file?

You're welcome.

To be honest I have no idea what that problem is, you will have to consult with somebody else. I never use W3d Viewer unless I am making Emitters.

Sorry I can't help more than I have.
