madrackz wrote on Fri, 27 June 2008 17:40If you have Scripts 3.4.3 do that:

Start "Skirmish Mode" now Press "F8" and type in "view <modelname>" type in the Modelname without ".W3D"

Example type "view enc_nobl" to view the Nod Obelisk

TY! But it is not working...I have scripts 3.4.4 and it says "no view" command or something like that.

Hmmm...I think I extracted the right file into W3D viewer...I only want to see Stealth Black Hand. And is this the right name for it? It is c_nod_stlth_.w3d

That is what I am trying to open...even if I open, the SBH dude is not appearing in the right side! Grrr!!!
