It gets about 50 mpg stock, with my exhaust mod it gets about 40 mpg but about 25 more HP. Its alot of fun to ride and make the kids around here look like fools on their little 600cc bikes. There are only two people that ride Buell Firebolts within 500 miles of according to the H.O.G. registry. It performs extremely well, like I said no one on a foreign bike except for the GSXR1000's and the Busas can compete with me. Handles turns extremely well do to center mounted exhaust. All around fun (fast) bike.
