ChewML wrote on Wed, 02 July 2008 10:11I did not know it already existed, but oh well.

How is it an advantage? They are just bullet holes.

Well, because they're bright yellow smileys, it means people will notice them easier. This will provoke them to smell and touch the bullet holes, and determine how long ago and from which direction the bullets were fired, thus revealing the relative location of the shooter. It also could cause increased happiness on the battlefield. \*shudders\*

(Epic sarcasm.)
