wyld12Not sure exactly what it does but
extras quantifigon
comes up with "extras enabled" after typing it in the command line
whether that means u still have to type in something else to actually do a cheat i dunno. Am still
sifting through the endless dead end cheats out there, as a lot pertain to the multiplayer like
fnkrmm/fngrrm. allguns was one that someone said works but be stuffed if i know how.

cheers

All you need to type is extras these days... :rolleyes:
