Well, alot of people seem to think that i forgot about Dead6, not working on Dead6, etc...

well, i hate to inform you all, but that is seriously not the case, as a matter of a fact, we have been busting our asses getting things done.

"Why don't you show us your work?"

Simple, we won't show you anything till it is in production state, this means that we have completed it, and it is ready to be spammed all over the place.

"Do you have anything in 'production state'?"

Yup, but we are going to hold a public chat to release them as promotional pics & desktops.

"Why did you post this then? And how do we really know you are moving along?"

Well, quite basically, it comes down to this, i posted because "RenEvo is closing", "What is the Dead6 X-Pack", "Dante has forgotten about us all " crap that i keep seeing. I have 2 xpansion packs, and a couple of programs i am working constantly on FOR this game, as well as for THIS community. I play planetside for fun, but only login about 2 or 3 times a week, get over it.

<http://www.renevo.com/d6/images/promo/>

that is the current file system, of UNempty directories, and a sneak peak at what we have planned.

Now, next month we will most likely have official beta sign ups, as well as some other items of interest

so, until then, follow this golden rule and all will be answered.

**SHUTUP AND MOD**
