Thanks Kirby for the feedback. A few notes:

- Bot toughness varies from server to server as well as the number of bots.
- unit upgrades and new weapons are coming but not yet implemented.
- I agree that there is a problem for new users: difficult to get past lasers and cannons to destroy buildings. I will have to figure out some way that new users can get into the beginner server and accomplish something without being trained by a helpful player.
- The music is live streamed and configurable. I haven't provided any alternative choices yet.

Did you play 0.520 or 0.521? 0.521 has swarming bot AI and a co-op mode.

Cheers,

LM
