Reasons I would not buy an iPhone:

- 1.Touchscreen form factor (I prefer phones with actual buttons like my Motorola Z6)
 - 2.The company that makes it is actively working to shut down hackers who hack the thing (Motorola isn't going after me or any of the other people hacking the Z6 and other Motorola linux phones)
 - 3.Price (its expensive compared to other phones to use as a phone and if I wanted an MP3 player I would buy an MP3 player and not a phone or I would use my Z6 as an MP3 player)
-
