ChewML wrote on Sat, 12 July 2008 20:57I am a moderator at n00bstories, so I have to use RG. I seriously doubt there is any chance of RG being disabled at n00bstories.

You can't run the HUDs with the radar maps because the ini files that they use are not on the RG allow list.

I played there some days ago, after 2mins playtime i got forced to use rg (from 3ppl lol), my K/d was 1/2. I think n00bstories is the last server with "rg loyalty".

Maybe you just have to wait for 4.0 scripts.
With 4.0 scripts will be RG complete down. (heard this, i hope im right)
