JoeBro wrote on Mon, 14 July 2008 12:35I really need to know an answer to the following questions:

1. What are all the "!" commands on Renegade?
2. How do you send a blue message to a specific player?

I'd be really happy if someone could tell me how. Thanks. Bye!

[</a>](mailto:joejoebro@live.com)

1. They are commands the server has put in place to aid players or administrators in their work. Some are even used to create objects (vehicles), award power ups, etc.
  2. Type / in either the F2 or F3 chat and then type the player's name. As soon as you hit space the message box will allow you to private message them.
