So, as the topic says; Renegade or any of the mods like APB/Reborn will not save screenshots to the data folder anymore. I know it's not the end of the world and people will probably tell me to get Fraps, but It's just been annoying me having to alt-tab out of the game a paste it into paint everytime.

Anyway, I notice it started happening after I reinstalled the games onto my new PC with Vista ( ) lol. So something must be different with Vista that stops renegade from saving screenies.

I've tried reinstalling and I've even taken a look at the Registry entries (not a lot of use though, 'cos I had no idea what I was doing lol).

So all in all, has anyone had this problem before? Or does anyone know what might be causing it anyway and know how to solve it?

Thanks in advance,

~Sam
