Romaner wrote on Mon, 21 July 2008 17:20well all that i am saying is that i like my privacy and except for renguard dont need any other program scanning my pc...

Renguard sux anyway, You can still bypass the cheats.
I used renguard when I first joined the renegade community.
It crashed on me often. I played servers without it and I didn't get so many crashes.
I'm happy bots are picking up the cheats now.
I'm sick of playing this game and getting a headshot from nowhere.
I don't enjoy playing this game at all when people cheat so i don't care what it takes to get cheaters. IF a bot has to scan my PC to make sure I'm not a harm to the game I'm fine with it. I have nothing to hide.
