As i saw in another forum the different type of reticle skins i have an ideas i think well be cool.....i think we should have different reticles PER weapon as in this ss is a few different ones

like for example

001=solider

004=grenadier

015=pistol

014=volt rifle

and so on.....just each type of weapon has its own reticle that matches what shoots out i think would be cool in TT patch
