A screenshot of the RenGuard 1.0323 application window. The window title is 'RenGuard 1.0323'. The main content area features a banner for 'COMMAND & CONQUER RENEGADE' with the tagline 'Experience C&C from a whole new perspective.' Below the banner is a navigation menu with links: 'Community MOTD', 'Server List', 'Beginner's Guide', 'Help', 'About RenGuard', 'RenGuard.com', and 'Support Chat'. The main text area displays a 'Core Patch Pre-Checks' message: 'RenGuard has detected a NEW CORE PATCH is available for download!!! RenGuard is preparing the installation of Core Patch 2. Please hold on. RenGuard is checking your installation. DO NOT PRESS RENEGADE! When the check is complete, the Core Patch installer will launch automatically. Click "Start Download" when you're ready to receive the patch.' Below the message is a log window showing the following text: '[19:31] Scanning C&C_Walls_Flying.mix..', '[19:31] Core Patch Pre-Check done', '[19:31] Starting Core Patch Download. This won't take long!', '[19:31] Download of download.exe complete', and '[19:31] An error occurred within RenGuard. Please report this error: StartProgram - 5'. At the bottom of the window, there are two buttons: 'Renegade' and 'Options'. The taskbar at the bottom shows the Windows Start button, several open applications including 'Windows Live...', 'Windows Medi...', 'King Drags - C...', and 'RenGuard 1.0...', and the system tray.
