Vancer2 wrote on Thu, 31 July 2008 03:28 Help sum guy said he could hack internet. Turns up he got my frineds computer and hacked into her email page and got photos of her that was private. Now he is threatening to hack into my computer. Is there anything that you guys recommend or maybe you could try hacking him and shutting him down plz i have important files on this pc and nothing to back it up. I Dont feel safe. For all i know he may be watchign me as i type this right now 0.o.

Wait for him to hack your computer and then hit it with a sledgehammer- the force of the blow will transfer through the internet straight into his computer and blow him the fuck away.
