Thanks bud you have all the fixes for my questions lol. I still have no video but the patcher.exe completed so that was cool. I guess I will reinstall for the 3rd time ) : I have no other idea how to fix my video. I do not understand why just earlier my video was working great on renegade but now that I have all of the patches working great now my video is completely black lol. Thanks again. Ill repost if I get any other problems.
