tufdude45ok, the basics of sniping. Never stand still, crouch, use w,a,s,d keys so u can run and jump at the same time, aim for head, and lastly and most importantly, practice, practice, PRACTICE. every awesome sniper sucked at one time or another but we practiced and yeah yeah yeah u know the story.

i use the arrow keys left and right shif and the middle mouse button (or wheele) push it down to jump.. so i can run and jump still.
