Im not looking for lower quality parts like ecs, biostar, galaxy etc, only top brand stuff. Anyway, ive decided to take the advice (and the million of google results boasting about the 8800 series), and go with a non-sli motherboard (cheaper, accepts 3/4 cores, pci-e 2.0, and 1066 mhz ram), and a PNY 8800GT, here is the new stuff:

<http://www.directcanada.com/products/?sku=11830BD0286&vpn=GA-MA78GM-S2H&manufacture=GIGABYTE>

<http://www.tigerdirect.ca/applications/SearchTools/item-details.asp?EdpNo=3435454&CatId=3670>

^Oh, and I decided to scale down to a 600w PSU, but upgraded my CPU to the 6400+, hoping to put all the orders through tommorrow, but anyone else got any other video card suggestions? (512mb, pci-e 2.0, geforce 8800 series, under \$150).
