Quote: noone forces you to install the patch. and if there are no oldpatchservers up maybe you're the only one don't want that stuff so we could safely ignore your wishes. Not nice, but democratic. first off you're wrong because the patch will autodownload when i try to get on xwis that means the 2nd part of your post also makes no sense since everyone online will have the patch and a server not running it would neither exist nor be open for me to join

and renegade is a democracy? really?
