CarrierII wrote on Sun, 17 August 2008 14:45 Sounds like your ISP's DNS is kind of useless.

Add the line

64.14.244.60 c.xwis.com

to your hosts file, removing any existing entries relating to "c.xwis.com", that might work.

I think that XWISC tool is broken...

tool always worked 4 me
