Ok I'm fed up with the cheat mod users, the AIMBOT people in paticular.

I Absolutely REFUSE TO DO THE SAME! and run that garbage! So I came up with a bomb turck idea to counter this. Here is what I did, I had a Hottie and an engineer throw proxys and remote C-4 ALL OVER an APC, when I got close enough I would start firing to let them know to detonate the C-4 (one way trip don't wait up for me, ALAHLAHLAHLAH), WE took out 3 Sukuras, 2 light tanks,

4 techs, and 2 engineers with this little stunt. Now as soon as it was over we had people yelling at us about how this was a "bannable offence"? "That was cheap" "you can't do that" "what a bunch of kamakazies" etc....

Is this an exceptable tactic or what?

Irix
