AMD Athlon 64 3700+  
2 gigs ram  
geforce 7600 gt  
sound blaster audigy 2 zs

Windows XP SP3

It did the same thing with SP2.

It does not crash in windowed mode. I haven't tried playing in full screen in a resolution other than native. I will try now.

EDIT: I can play in full screen in 1152x864 with no crash. But bullets don't show up. Oo.
