sorry for double post but.

does anyone use filezilla? i got mine working with file's but it say's my firewall or router is blocking it from connecting to the site and it also say's make sure i got the latest version of firmware wtf is that?

This is what i get when i run the connection wizard.

Quote:Connecting to probe.filezilla-project.org

Response: 220 FZ router and firewall tester ready

USER FileZilla

Response: 331 Give any password.

PASS 3.1.2

Response: 230 logged on.

Checking for correct external IP address

Retrieving external IP address from <http://ip.filezilla-project.org/ip.php>

Checking for correct external IP address

IP 71.126.204.242 hb-bcg-cae-cec

Response: 200 OK

PREP 2549

Response: 200 Using port 2549, data token 234454597

PORT 71,126,204,242,9,245

Response: 502 Port mismatch. Tainted by router or firewall.

PORT command tainted by router or firewall.

Connection closed

i also get this.

How would i go about changing my router settings?
