---

I am currently having problems with my RA2/YR games. I installed RA2 last night, I felt like playing, and I had this problem before and I thought I could fix it, but I guess not. Anyways, I got home from school today tried to go on, I have an hour left before i go back to football practice, so I haven't played in a mad long time, I booted the game up today, all of a sudden the movie starts to roll for RA2. Surprisingly NO sound shows up at all, my speakers are up as loud, I check the sound files in my RA2 folder, nothing works. Now I wanted to see if Yuris has the same problem. and it did. Anyone tell me whats wrong here?

Thanks.
