SSnipe wrote on Wed, 01 October 2008 15:25: What are windows servers for? wikipedias to much info on its specs not the simple line of what it can do basically

System Management from one place.

You can modify 200 PC's for a example by applying group policy's.

Just google up:

Active directory.

DNS

DHCP

Terminal Server

DFS root

Group policy (GPO)
