Distrbd21 wrote on Thu, 02 October 2008 21:03Hey guy's i would like to know if this would be html or not but,

I would like to know away to find out if an anwser is correct or not.

So like i would ask in the html code, how to spell announced and you would have a place to give an anwser and when you click submit it will tell you if your right or wrong.

Speaking of the H.T.M.L. anyone know of a program that allows me to turn a Microsoft Word Document into an H.T.M.L. document.
